SKILLS

Database Management	MongoDB
JavaScript	MySQL
jQuery	NoSQL
HTML & CSS	Git
Node.JS	RESTful API
REACT	Heroku

PROJECTS

❖ **Crypto-Checker**

Crypto-Checker utilizes Javascript, HTML, CSS and third party API like CoinGecko and CSS like Materialize in order to inform a user about current cryptocurrency prices in real time.

- A team project in which the team-members used API's to fetch Crypto information. The team used CSS and HTML to format the displayed site, and used JS to format the functionality.

❖ **Copy-Cat Games**

Copy-Cat Games utilizes Javascript, HTML, CSS, Bootstrap, MySQL2, Handlebars and Express and Node in order to have users create accounts and browse our store or forum.

- This full stack web application allows a user to view a storefront for Copy Cat Games' featured products. The login of the user allows features that are not available to users that are not logged in. The application also provides a forum that adds a community aspect to the storefront. Users passwordss are hashed for security purposes.

❖ **My-Budget**

My-Budget is an Full-stack M.E.R.N application which utilizes MongoDB, Bootstrap, REACT, JSON Web Tokens and Javascript to allow users to create accounts and track their finances.

- This M.E.R.N. full stack application dynamically and safely displays the user's sensitive budgeting information once authenticated. JSON Web Token is utilized for secure authentication. This application was created with the aim to streamline and visualize the user's sensitive budget through categories. Bootstrap has been used to make the application's styling responsive to even mobile sizes.
